The image shows a screenshot of the Tecplot 360 EX 2017 R2 software interface. The main window displays a 3D Cartesian plot of velocity magnitude  $|u|$  over a complex, multi-ported cylindrical geometry. A color scale on the left indicates values from 0.0005 to 0.0090. An 'About Tecplot 360 EX' dialog box is open in the foreground, providing version information (2017.2.0.79771), copyright details (1988-2017 Tecplot, Inc.), and runtime environment statistics such as RAM usage (111 MB) and processor count (4). The software interface includes a menu bar (File, Edit, View, Plot, Insert, Animate, Data, Frame, Options, Scripting, Tools, Analyze, Help), a toolbar with various navigation and analysis tools, and a left-hand panel with options for 'Snap to orientation view', 'Show zone layers' (Mesh, Contour, Shade, Vector, Edge, Scatter), 'Zone Style...', 'Solution time: 0', 'Show derived objects' (Iso-Surfaces, Slices, Streamtraces), and 'Show effects' (Lighting, Translucency). The bottom status bar shows the system tray with the time 22:55.
